

LIAP Mini.

Product facts - September 2026

A compact network amplifier designed for one compatible passive speaker. Power in, speaker out; audio and system control through LIAP.

Product	LIAP Mini
Category	Network audio amplifier
Status	In development
Audio input	LIAP over Wi-Fi
Speaker output	One compatible passive loudspeaker
Setup	SzaboWorks App Center (planned)
Availability	To be announced

Development, clearly stated.

Production implementation in development. Targeting 4-8 Ω passive loudspeakers; final compatibility subject to EVT validation. Network-audio proof of concept and wireless playback prototype: milestones reported by SzaboWorks. Compact production PCB: designed; physical validation pending. Production-style EVT is the next hardware milestone. Certification is planned.

Final output power, supported loads, dimensions, synchronization performance and compatibility remain subject to validation. No commercial delivery date has been announced.
